PERSONAL PROFILE

Full-Stack Software Engineer with experience building scalable web applications, enterprise integrations, and transaction-driven systems. Skilled in backend development, API design, database architecture, and secure software engineering using Python, FastAPI, React, TypeScript, Node.js, and PostgreSQL. Experienced in supporting mission-critical telecom systems and designing business software that improves operational efficiency and data integrity.

ACADEMIC BACKGROUND

Kwame Nkrumah University of Science and Technology
B.Sc. Computer Engineering.

Aug 2010 – Jun 2014

EMPLOYMENT DETAILS

Monterosa
Software Engineer

Dec 2023 – Date

- Designed and implemented scalable web application features using modern frontend and backend technologies.
- Built and maintained RESTful APIs enabling reliable communication between distributed services.
- Diagnosed and resolved production issues to improve application stability and performance.
- Participated in peer code reviews and promoted maintainable, high-quality code.

Tech Mahindra
Oracle SOA L2 Support (ESF, BSS and BOOST Project)

May 2020 – Nov 2023

- Supported enterprise service integrations powering high-volume telecom and financial transaction platforms.
- Diagnosed production failures through log analysis, service tracing, and Oracle Enterprise Manager.
- Analyze system logs and service flows to identify issues affecting revenue-generating services.
- Collaborated with engineering teams to restore critical services and minimize downtime.
- Maintained availability of business-critical integrations supporting revenue-generating telecom services.

Vodafone Ghana
Billing Integrity Lead

Dec 2016 – Apr 2020

- Led monitoring and validation of telecom billing processes to ensure accurate customer charging.

- Conducted reconciliation between service usage records and billing outputs to detect revenue leakages.
- Investigated billing discrepancies and implemented corrective actions to prevent potential revenue losses.
- Collaborated with IT and finance teams to improve billing controls and reporting accuracy.

National Service Secretariat

Sep 2014 – Aug 2015

IT System Support

- Provided technical support for internal systems and IT infrastructure.
- Assisted users in troubleshooting software and system-related issues.
- Maintained system uptime through proactive monitoring and issue resolution.

PROFESSIONAL CERTIFICATION

Oracle SOA Suite 11g/12c: Implementation specialist:

Key Technologies: WebLogic Server, Oracle JDeveloper, JMS Adapters, FTP, JDBC, BPEL, Human Task, Business Rules

Oracle Identity and Access Management 11g/R2:

Technologies: LDAP, OAM, OIM, RCU, OHS, Single Sign-On

PROJECT/ACHIEVEMENTS

MTN Ghana – ESF, BSS and BOOST Integration

- Supported integration of Enterprise Service Framework (ESF) with telecom business support systems.
- Participated in development and deployment of SOA composite applications for system interoperability.
- Assisted in monitoring and administration of enterprise integrations using Oracle Enterprise Manager.

Bait Consult – Data Integration Platform

- Developed a SOA-based integration solution to expose database information to external cloud applications.
- Integrated multiple adapters including JDBC, FTP, and JMS through Oracle SOA Mediator.
- Administered deployed services using Oracle Enterprise Manager to ensure stable operations.

COMPUTING SKILLS/INTEREST

- **Programming Languages:** JavaScript, Python (FastAPI/Flask – API development), HTML, CSS, JavaScript, React, PostgreSQL, SQL
- **Integration & Enterprise Systems**
Oracle SOA Suite, Oracle Service Bus
WebLogic Server, JMS, JDBC, FTP
Distributed Systems & Service Orchestration
- **Platforms & Tools:** VS Code, Oracle JDeveloper, WebLogic Server, Linux, Shell Scripting
- **Application Security & Reliability**
Secure coding practices & input validation
Authentication & authorization (JWT, RBAC concepts)
API security fundamentals (OWASP Top 10 – in progress)
Log analysis, incident troubleshooting & root cause analysis
Data integrity & transaction validation
- **Cloud & DevOps (In Progress)**
AWS (EC2, S3, IAM – learning & hands-on labs)
Basic cloud security concepts (IAM roles, least privilege)

System monitoring & deployment fundamentals

- **Personality:** I enjoy learning new languages; play a lot of pc games and am a keen aviation enthusiast.
